

2pad launches a new, redesigned Website.

2pad, the revolutionary service that turns emails into a photo/video gallery, launches a new redesigned Website.

San Francisco, USA (PRWEB) September 8, 2008 --

At the occasion of the Techcrunch50 show in San Francisco, 2pad launches its new Website.

"We listened to our users and worked with an expert website architect to redesign our service and make it much easier to use and at the same time prettier.", says Aaron Boublil, 2pad's CEO.

2pad's new website is available immediately, users can sign-up for free at <http://www.2pad.com>

Once they sign-up 2pad will create their private photo/video gallery automatically from their emails (supported services are currently Hotmail, Gmail, AOL and most IMAP services). They will then enjoy all their pictures and easily find, share and print them.

The 2pad's team is available at 2pad's booth number 8 at the Techcrunch50 show, 635 8th Street, San Francisco, CA, from the 8th to the 10th of September 2008.

About 2pad

2pad, the first private online media sharing service, allows users to enjoy the photos and videos they exchange by email in a private online gallery - automatically created and synchronized from user's emails.

2pad's automatic extractor will access a user's emails on supported services (most IMAP4 services including AOL mail and Gmail), find and extract photos and videos from the emails and add them to the user's private 2pad online gallery.

In addition each picture will be tagged with the subject and body text from the email containing it - and associated with the sender and recipients information for easy navigation and search in the gallery.

To benefit from this new feature users just need to sign-up for free at <http://www.2pad.com>.

Established in 2006, 2pad (<http://www.2pad.com>) proudly stands as the first email 2.0 photo & video gallery. Based on the idea that email will always remain a constant in the world, 2pad was created to allow users to enjoy all the benefits of a Web 2.0 private online gallery while continuing to exchange photos and videos by email.
